Japan Bio Science Laboratory

■ The Ashitaba plant (*Angelica keiskei*) is native to the Izu islands off Japan's Pacific coast.

■ The nutritional value of the Ashitaba plant exceeds even the healthiest vegetables.

■ The leaves of the Ashitaba plant provide more valuable nutrients (such as fiber, calcium, Vitamin A, Vitamin B2 and Vitamin K, among others) than carrots, tomatoes or spinach.

■ The edible raw leaves of the Ashitaba plant contain 0.2% to 0.3% chalcones.

■ **Ashitaba Leaf Powder** efficiently increases the nutritional value of any food or supplement.

■ Product has a pleasant taste (green tea-like flavor) and is easily included in functional foods and beverages, even noodles

■ JAS (Japanese Agricultural Standard) Organic Certified

Nutritional Profile

per 100 grams	Fiber g	Iron mg	B-Carotene mg	Protein g	Vitamin B1 mg	Vitamin B2 mg
Ashitaba	44.5	11.5	13.7	17.30	0.39	0.82
Kale	3.6	0.8	5.9	4.3	0.12	0.07
Spinach	3.5	3.7	5.6	2.9	0.13	0.23
Cabbage	1.9	0.4	0.004	1.3	0.05	0.05
Celery	1.3	0.2	0.03	0.7	0.03	0.03
Carrots	2.4	0.8	8.3	0.9	0.07	0.05
Tomatoes	0.7	0.3	0.05	0.9	0.05	0.03

About JBSL

Since its foundation in 1974, JBSL has been developing and manufacturing functional health food products under the corporate belief in the harmony of human beings and Mother Nature. Today, the safety and quality of food products are of higher concern than ever before. That is why our quality policy is the pursuit of safety from the viewpoint of the consumer.

OUR CURRENT PRODUCTS INCLUDE:

Ashitaba Leaf Powder
Bacillus Subtilis Natto
Biozyme
ChalCurb®
Elastin
Kaboseed EX
NSK-SD®
Pro-K-Natto
Sesame Minerals
Vitamin K2

Japan Bio Science Laboratory

Production

In pursuit of the highest quality, JBSL has vertically integrated its production of **Ashitaba Leaf Powder**. JBSL's organic farms in Indonesia rely solely on organic and eco-friendly methods of fertilization and pest-removal for the cultivation of the Ashitaba plant. On 60 hectares of fertile land in Lombok, Indonesia – rich in fresh air and clean water – farmworkers carefully prepare the soil, weed, mulch with organic fertilizer, and protect against insects without the use of pesticides. The organically-grown Ashitaba plants are then exported to Japan for processing into bulk powder or dried juice powder. JBSL is a pioneer in the research on the functionality of Ashitaba and in the development of the cultivation method.

Benefits

■ Orac value: 28,000 units/100g	■ Magnesium content: 103mg/100g	■ Iron content: 11.50mg/100g
■ Fiber content: 44.50g/100g	■ Lutein content: 33.20mg/100g	■ Vitamin K1 content: 2.62mg/100g
■ Protein content: 17.30g/100g	■ Vitamin E content: 22mg/100g	■ Vitamin A content: 1.14mg/100g
■ Phosphorus content: 321mg/100g	■ B-Carotene content: 13.7mg/100g	

Harness the Power of Mother Nature

JBSL is a pinioneer in the research on the functionality of Ashitaba and in the development of the cultivation method. Visit our website or contact our offices for more information.
